Ashok D. Belegundu  
Ph.D., The University of Iowa, 1982  
Professor of Mechanical Engineering  
330 Leonhard  
814-863-2115  |  adb3@psu.edu  
Research interests: Optimization, finite elements, mechanics

Catherine Berdanier  
Ph.D., Purdue University, 2016  
Research Associate  
206 Reber  
814-865-0040  |  cgb9@psu.edu  
Research interests: Graduate-level engineering education; interdisciplinary engineering education; engineering writing; and online engineering learning and cognition

Sean N. Brennan  
Ph.D., University of Illinois at Urbana-Champaign, 2002  
Professor of Mechanical Engineering  
157E Hammond  
814-863-2430  |  sbrennan@psu.edu  
Research interests: Vehicle dynamics and automation; ground robotics; human-in-the-loop and hardware-in-the-loop; and sensing and control utilizing big data

Nicholas R. Brown  
Ph.D., Purdue University, 2011  
Assistant Professor of Nuclear Engineering  
229 Reber  
814-865-4863  |  nrb26@psu.edu  
Research interests: Nuclear reactor analysis and design, nuclear reactor safety, sustainable nuclear fuel cycles, advanced reactors, advanced nuclear fuel and cladding materials, and process heat applications of nuclear energy

Liming Chang  
Ph.D., University of Illinois at Urbana-Champaign, 1988  
Professor of Mechanical Engineering  
322 Leonhard  
814-865-6852  |  lxc20@psu.edu  
Research interests: Tribology, lubrication, computational modeling

Bo Cheng  
Ph.D., Purdue University, 2012  
Assistant Professor of Mechanical Engineering  
338B Reber  
814-867-5963  |  buc10@psu.edu  
Research interests: Animal locomotion, biologically inspired robotics, experimental fluid dynamics, control

Fan-Bill Cheung  
Ph.D., The University of Notre Dame, 1974  
George L. Guilmet Professor of Mechanical and Nuclear Engineering  
304 Reber  
814-863-4261  |  fbx4@psu.edu  
Research interests: Solidification and melting, turbulent natural convection, two-phase flow and heat transfer, nuclear reactor thermal hydraulics and safety, thermal processing of materials, thermal behavior of high-temperature ablative, dense spray and atomization

Sukwon Choi  
Ph.D., Georgia Institute of Technology, 2013  
Assistant Professor of Mechanical Engineering  
306 Reber  
814-863-4355  |  sfc5185@psu.edu  
Research interests: Micro/nanoscale thermal characterization; Multi-physics analysis of microelectronics and MEMS; Wide bandgap/ultra-wide bandgap semiconductor devices; Thermal management of microelectronics; Semiconductor device reliability

John M. Cimbala  
Ph.D., California Institute of Technology, 1984  
Professor of Mechanical Engineering  
234 Reber  
814-863-2739  |  jmc6@psu.edu  
Research interests: Experimental and computational fluid dynamics and heat transfer, flow visualization, neutron radiography, turbulence modeling, air pollution, indoor air quality, turbomachinery, hydropower

Daniel H. Cortes  
Ph.D., West Virginia University, 2009  
Assistant Professor of Mechanical Engineering  
329 Leonhard  
814-863-3103  |  dhc13@psu.edu  
Research interests: Diagnosis of injuries and evaluation of treatments in orthopedic tissues by combining: tissue biomechanics, numerical modeling, and medical imaging

Jing Du  
Ph.D., Princeton University, 2012  
Assistant Professor of Mechanical Engineering  
316B Leonhard  
814-863-1043  |  jingdu@psu.edu  
Research interests: Solid mechanics, fracture mechanics, biomechanics, biomaterials, bio-inspired design, medical devices, electronic devices

Hosam Fathy  
Ph.D., University of Michigan, 2003  
Bryant Early Career Assistant Professor of Mechanical Engineering  
157D Hammond  
814-867-4442  |  hfk2@psu.edu  
Research interests: Optimal control/estimation, with application to hybrid vehicles; photovoltaics; periodic flight control; battery energy storage; and building/grid energy

Mary Frecker  
Ph.D., University of Michigan, 1997  
Professor of Mechanical Engineering  
Associate Department Head for Graduate Programs  
326 Leonhard, 127 Reber  
814-865-1617, 814-865-1345  |  mxf36@psu.edu  
Research interests: Optimal design, compliant mechanisms, smart structures, medical devices, origami engineering
Aman Haque  
Ph.D., University of Illinois at Urbana-Champaign, 2002  
Professor of Mechanical Engineering  
317A Leonhard  
814-865-4248 | mah37@psu.edu  
Research interests: Micro and nanoelectromechanical systems, nanoscale materials (mechanical, thermal and electrical behavior, electron microscopy

Daniel C. Haworth  
Ph.D., Cornell University, 1986  
Professor of Mechanical Engineering  
140 Research East  
814-863-6269 | dch12@psu.edu  
Research interests: Computational thermal-fluids sciences including fluid mechanics, turbulence, combustion, numerical methods, IC engines, and transportation propulsion systems

Seungjin Kim  
Ph.D., Purdue University, 1999  
Professor of Mechanical and Nuclear Engineering  
230 Reber  
814-867-1783 | sxk86@psu.edu  
Research interests: Thermal-hydraulics and reactor safety, multi-phase flow phenomena, interfacial area transport, geometric effects in two-phase flow transport, development of two-phase flow instrumentation

Reuben Kraft  
Ph.D., The Johns Hopkins University, 2008  
Shuman Early Career Assistant Professor of Mechanical Engineering  
320 Leonhard  
814-867-4570 | rhk12@psu.edu  
Research interests: Computational biomechanics, neuromechanics, high strain-rate behavior of materials, high performance computing, injury biomechanics, dynamic failure mechanisms, shock and impact physics, soft tissue physics

Anil K. Kulkarni  
Ph.D., Brown University, 1980  
Professor of Mechanical Engineering  
205 Reber  
814-865-7073 | akk@psu.edu  
Research interests: Combustion, fluid mechanics, heat transfer

Robert Kunz  
Ph.D., Penn State, 1991  
Professor of Mechanical Engineering  
301C Reber  
814-865-2144 | rkf102@psu.edu  
Research interests: Computational fluid dynamics, multiphase flows, turbomachinery, nuclear reactor thermal-hydraulics and thermal management analysis

Thomas A. Litzinger  
Ph.D., Princeton University, 1986  
Professor of Mechanical Engineering  
Director of The Leonhard Center for the Enhancement of Engineering Education  
Assistant Dean for Educational Innovation and Accreditation  
201 Hammond  
814-865-4015 | tal2@psu.edu  
Research interests: Combustion, emissions, gas turbines, rockets, problem solving, learning

Stephen Lynch  
Ph.D., Virginia Polytechnic Institute and State University, 2011  
Assistant Professor of Mechanical Engineering  
331 Reber  
814-867-4768 | spl11@psu.edu  
Research interests: Turbomachinery aerodynamics and heat transfer, convective heat transfer, experimental diagnostic equipment for laminar-turbulent transition, turbulent boundary layers

Guha Manogharan  
Ph.D., North Carolina State University, 2014  
Assistant Professor of Mechanical Engineering  
232 Reber  
814-863-7273 | gum53@psu.edu  
Research interests: Additive manufacturing, hybrid manufacturing, biomedical implants via additive manufacturing, CNC and non-traditional machining and design optimization for additive manufacturing

Eric Marsh  
Ph.D., Massachusetts Institute of Technology, 1994  
Professor of Mechanical Engineering  
Associate Department Head of Undergraduate Programs  
1408 Reber  
814-863-1503 | emr7@psu.edu  
Research interests: Precision engineering, manufacturing

Anne Martin  
Ph.D., University of Notre Dame, 2014  
Assistant Professor of Mechanical Engineering  
338C Reber  
814-863-4114 | aem34@psu.edu  
Research interests: Robotic controls; modeling human gait; improving impaired locomotion; predictive modeling; dynamics of rigid bodies

Jason Moore  
Ph.D., University of Michigan, 2010  
Assistant Professor of Mechanical Engineering  
318 Leonhard  
814-865-1749 | jzm14@psu.edu  
Research interests: Medical device design, tissue cutting mechanics, tissue dynamics

Arthur T. Motta  
Ph.D., The University of California, Berkeley, 1988  
Professor of Nuclear Engineering and Materials Science and Engineering  
Chair of the Nuclear Engineering Program  
138 Reber  
814-865-0036 | atm2@psu.edu  
Research interests: Materials behavior in the reactor environment, corrosion, hydriding and radiation damage

Gary Neal  
Instructor in Mechanical Engineering  
314A Leonhard Building  
814-863-5468 | gnh103@psu.edu  
Research interests: Advanced automotive propulsion system integration, design, and optimization; hybrid electric vehicle design; energy storage system design; transportation energy use optimization; project and personnel management; underwater weapons; drivetrain technology

Rui “Ray” Ni  
Ph.D., The Chinese University of Hong Kong, 2011  
Assistant Professor of Mechanical Engineering  
326 Reber  
814-863-5821 | rnx5006@psu.edu  
Research interests: Lagrangian particle tracking, transport of fluid in complex environment, turbulent thermal convection, fiber flow, thermal energy management
Jacqueline O’Connor  
Ph.D., Georgia Institute of Technology, 2012  
Assistant Professor of Mechanical Engineering  
Dorothy Quiggle Career Developmental Professorship  
111 Research East  
814-863-1502 | jxo22@psu.edu  
Research interests: Gas turbine and diesel engine combustion, combustion instability, hydrodynamic stability, fuel injection, emissions control, high-speed laser diagnostics

Zoubeida Ounaies  
Ph.D., Penn State, 1996  
Professor of Mechanical Engineering  
Associate Department Head of Administration  
1578 Hammond  
814-867-4443 | zxo100@psu.edu  
Research interests: Structures-property relationships of functional polymers and polymer nanocomposites with unique combinations of mechanical-electrical-magnetic coupling, with applications in smart sensors and actuators.

Matthew Parkinson  
Ph.D., University of Michigan, 2004  
Associate Professor of Engineering Design and Mechanical Engineering, Interim Director of the Bernard M. Gordon Learning Factory  
213 Hammond  
814-863-9079 | parkinson@psu.edu  
Research interests: Design for human variability, biomechanics, optimization, augmented and virtual reality, biomedical device design

Laura L. Pauley, P.E.  
Ph.D., Stanford University, 1988  
Professor of Mechanical Engineering  
305 Reber  
814-863-4259 | llp1@psu.edu  
Research interests: Computational fluid dynamics, unsteady separated flows, boundary layer stability

Horacio Perez-Blanco  
Ph.D., University of Illinois at Urbana-Champaign, 1979  
Professor of Mechanical Engineering  
204 Reber  
814-865-7842 | hpb1@psu.edu  
Research interests: Simultaneous heat and mass transfer, transient analysis, advanced gas turbine cycles, space conditioning with novel absorption chillers and heat pumps

Christopher Rahn  
Ph.D., The University of California, Berkeley, 1992  
Professor of Mechanical Engineering  
Co-director of BEST  
Associate Dean of Innovation  
150A Hammond  
814-865-6237 | cdrahn@psu.edu  
Research interests: Dynamic systems modeling, design, analysis, and control with applications to flexible structures, biologically inspired robotics, smart material actuators, sensors, and energy harvesters, and electrochemical energy storage

Alexander Rattner  
Ph.D., Georgia Institute of Technology, 2015  
Assistant Professor of Mechanical Engineering  
236A Reber  
814-863-4387 | asr20@psu.edu  
Research interests: Sustainable thermal-fluid energy systems, waste heat recovery, multiphase flow heat and mass transfer, high performance computing

Asok Ray, P.E.  
Ph.D., Northeastern University, 1976  
Distinguished Professor of Mechanical Engineering, Electrical Engineering, Mathematics, and Nuclear Engineering  
329 Reber  
814-865-6377 | axr2@psu.edu  
Research interests: Machine Learning, Instrumentation & Control, Information theory, Signal Processing, and Nonlinear Dynamics & Chaos

Timothy Simpson  
Ph.D., Georgia Institute of Technology, 1998  
Professor of Mechanical Engineering and Paul Morrow Professor in Engineering Design and Manufacturing  
209 Leonhard  
814-863-7136 | tws8@psu.edu  
Research interests: Engineering design and design optimization, product family and product platform design, mass customization, multi-dimensional visualization, surrogate modeling

Alok Sinha  
Ph.D., Carnegie Mellon University, 1983  
Professor of Mechanical Engineering  
330 Reber  
814-863-3079 | axs22@psu.edu  
Research interests: Vibration, control systems, nanomechanics, diagnostics and prognostics of dynamic systems, jet engines

H. Joseph Sommer III  
Ph.D., University of Illinois at Urbana-Champaign, 1980  
Professor of Mechanical Engineering  
337 Leonhard  
814-863-8997 | hjso1@psu.edu  
Research interests: Kinematics, robotics, machine vision, biomechanics, and unmanned aircraft

Stephanie Stockar  
Ph.D., The Ohio State University, 2013  
Assistant Professor of Mechanical Engineering  
136 Research East  
814-863-6276 | sus772@psu.edu  
Research interests: Internal combustion engines, advanced powertrain systems, building energy systems, optimization and control

Karen A. Thole  
Ph.D., The University of Texas at Austin, 1992  
Department Head and Distinguished Professor  
136 Reber  
814-865-2519 | kthole@psu.edu  
Research interests: Convection, turbine heat transfer, and additive manufacturing

Stefan T. Thynell  
Ph.D., North Carolina State University, 1986  
Professor of Mechanical Engineering  
114 Research East  
814-863-0977 | thynell@psu.edu  
Research interests: Ignition and combustion of propellants, thermal decomposition of liquid and solid energetic materials, FT-IR spectroscopy and time-of-flight mass spectrometry, thermal radiation
Michael Tonks  
Ph.D., University of Illinois at Urbana-Champaign, 2008  
Assistant Professor of Mechanical Engineering and Nuclear Engineering  
233 Reber  
814-863-1323 | mrt5296@psu.edu  
Research interests: Predicting the coevolution of microstructure and properties of materials in harsh environments, mesoscale computational materials science, computational methods

Martin W. Trethewey  
Ph.D., Michigan Technology University, 1981  
Arthur L. Glenn Professor of Mechanical Engineering  
336 Leonhard  
814-865-1961 | mwmtme@psu.edu  
Research interests: Machine dynamics, signal processing, condition based machine diagnostics, experimental modal analysis, vibrations, noise control, product design

Kenan Unlü  
Ph.D., The University of Michigan, Ann Arbor  
Director of Radiation Science and Engineering Center  
Professor of Nuclear Engineering  
Breazeale Nuclear Reactor  
814-865-6351 | kku2@psu.edu  
Research interests: Development and applications of nuclear analytical techniques, neutron depth profiling, cold neutron prompt gamma activation analysis, neutron radiography and neutron activation analysis

Adri van Duin  
Ph.D., Delft University of Technology, The Netherlands, 1996  
Professor of Mechanical Engineering  
240 Research East  
814-863-6277 | acv13@psu.edu  
Research interests: Atomistic-scale simulations of chemical reactions, reactive force fields (ReaxFF), quantum chemistry, combustion reactions, interface chemistry, organic geochemistry

Paris von Lockette  
Ph.D., University of Michigan, 1999  
Associate Professor of Mechanical Engineering  
338A Reber  
814-865-2761 | prv2@psu.edu  
Research interests: Mechanics of multi-field active structures and devices; microstructure property relationships in active nonlinear composites; magneto-active elastomers for self-locomotion, compliant actuation, and origami engineering

William Walters  
Ph.D., Virginia Polytechnic Institute and State University, 2015  
Assistant Professor of Nuclear Engineering  
228 Reber  
814-867-4329 | wjw24@psu.edu  
Research interests: Computational methods for the simulation of radiation transport; modeling of nuclear systems using Monte Carlo, deterministic, and hybrid transport methods

Chao-Yang Wang  
Ph.D., The University of Iowa, 1994  
William E. Diefenderfer Chair of Mechanical Engineering  
Director of Electrochemical Center  
Co-director of BEST  
162 Materials Research Laboratory  
814-863-4762 | cwx31@psu.edu  
Research interests: Full cells and batteries, multiphase transport, modeling, and diagnostics

Donghai Wang  
Ph.D., Tulane University, 2006  
Associate Professor of Mechanical Engineering  
134 Materials Research Laboratory  
814-863-1287 | duw13@psu.edu  
Research interests: Design and synthesis of nano-structured functional materials, and clean energy technologies including batteries, solar cells, and fuel cells

Qian Wang  
Ph.D., Princeton University, 2001  
Professor of Mechanical Engineering  
325 Leonhard  
814-865-8281 | qwu6@psu.edu  
Research interests: Robust control, nonlinear control, optimization and soft computing, system dynamics and control with application to mechanical and aerospace systems, as well as information and computer systems

David Williams  
Ph.D., Stanford University, 2013  
Assistant Professor of Mechanical Engineering  
328 Reber  
814-863-2181 | dmw72@psu.edu  
Research interests: Computational fluid dynamics, external aerodynamics, finite element analysis, high-order methods, and solution-adaptive meshing

Tak-Sing Wong  
Ph.D., University of California, Los Angeles, 2009  
Wormly Early Career Assistant Professor of Mechanical Engineering  
N330 Millenium Science Complex  
814-865-6122 | tsw17@psu.edu  
Research interests: Biomimicry and bioinspired engineering, micro- and nanomanufacturing, surface and interfacial engineering

Yuan Xuan  
Ph.D., California Institute of Technology, 2014  
Assistant Professor of Mechanical Engineering  
106 Research East  
814-865-2165 | yux19@psu.edu  
Research interests: Turbulent combustion, soot formation, numerical methods, uncertainty quantification

Savas Yavuzkurt  
Ph.D., Stanford University, 1978  
Professor of Mechanical Engineering  
327 Reber  
814-865-3340 | sty@psu.edu  
Research interests: Turbulent flows (experimental and theoretical), convective heat transfer, Gas Turbine Heat Transfer, experimental methods in fluids, combustion and alternate energy sources

Richard A. Yetter  
Ph.D., Princeton University, 1985  
Professor of Mechanical Engineering  
111 Research East  
814-863-6375 | ray8@psu.edu  
Research interests: Combustion/environmental science, combustion chemistry, heterogeneous combustion, materials synthesis, propellant combustion, combustion generated pollutants, atmospheric plume chemistry, chemical processing
