Safety Thought of the Month

Have you noticed an individual or a lab who has made a significant safety improvement in the past month?

If so, nominate them for the Safety Improvement of the Month Award! Feel free to nominate those who have won safety awards in the past if you see them making significant improvements in our department.

Nominate qualified individuals/labs for next month’s award by sending your recommendation (http://www.che.psu.edu/safety/safety_nomination.htm) to Roger Dunlap at rdunlap@engr.psu.edu by October 20th.

Safety Improvement of the Month

NEWS

The owner of Martin Foundry Inc. and three representatives from Compliance Professionals Inc. have been fined for repeatedly refusing OSHA inspection. The inspection was brought on due to a report of an employee with an elevated level of lead in their blood stream. The total fine amounts to approximately $18,000 and is a result of “disobeying an administrative search warrant issued by a judge to cooperate with an OSHA inspection.”

Did You Know?

Safety Notice: Faulty hotplates involved in recent fires are Corning models PC-35 and PC-351 and the Thermolyne SP46925. The issue with these hotplates is that they may spontaneously heat in the OFF position. If you have one of these hotplates, consider replacement or contact EHS.
